Waterproof

Fixtures

RSS Series, with elegance style, reflects the light in high efficiency and do not deform in long period of time thanks to high quality polycarbonate housing. It can be manufactured in square or round style according to ambience and request. It could be easily used with energy saving lamps long time for indoor and outdoor areas through their waterproof and dustproof features.

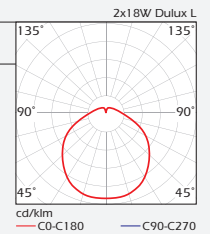

RSS 300

Description

Housing: Made of hardly flammable white polycarbonate (PC).
Diffuser: PM diffusers made of UV-resistant (PMMA). The material boasts high translucency, surface hardness, resistance to weathering and ageing, and outstanding resistance to chemical influences.
